

- Breather membrane
- 150 X 50 C24 rafter @ 600 c/s
- 100mm PUR/ PIR Insulation between rafters
- 70mm PUR/ PIR Insulation between rafters
- truss clip
- Vapour barrier over taped joint of PUR
- Plaster board
- Timber fillet beneath rafters with insulation between
- 150 X 50mm wall plate strapped down wall
- Wet plaster
- 150 Block wall
- 200 EPS
- Thin coat render

- Breather membrane
- 150 X 50 secondary rafter @ 600 c/s at hit and miss between main rafters supported on battens on hangers off of main rafter
- 100mm PUR/ PIR Insulation between rafters
- 150mm Glass fibre full fill Insulation between rafters
- Structural noggins on hangers off of main rafters
- Vapour barrier over taped joint of PUR
- 50mm PUR Insulation under rafters, joints taped
- Vapour barrier over taped joint of PUR
- Plaster board
- truss clip
- 150 X 50mm wall plate strapped down wall
- Wet plaster
- 150 Block wall
- 200 EPS
- Thin coat render
